Master Function Introduction

Master - Dashboard (1/2)

Master - Dashboard (2/2)

Master - Management (1/2)

The screenshot displays the VisionMax Master Management interface. On the left is a sidebar with navigation links: Dashboard, Analysis, Management (selected), Inventory, Diagnostics, Fleets, User Account, and Billing. The main content area is titled 'Fleets' and includes a search bar for 'Fleet ID', a 'Clear' button, and a '+New Fleet' button. Below the search bar, it shows 'Result : 417'. A blue callout box with white text states: 'This is the **Management** within the Master, where you can create and manage Fleets, and assign CDRs to specific fleets.' The bottom of the screen shows a table of fleet data.

Fleet - Dashboard - Live View (2/2)

The screenshot displays the VisionMax Fleet Dashboard interface. On the left is a sidebar menu with options: Main Page, Fleet Overview, Dashboard, Trip, Safety, Management, Configurations, Administration, Accounts & Permissions, Fleet, and Device Usage. The main dashboard area shows a 'Dashboard' header with 'Online Device' count (33), 'Total Devices in Service' (579), 'Trip Summary' (Trip: 6231, Driving Distance: 76607.89), and a 'Fleet Highlight' section. A central window titled 'XV15CY' displays a live video feed of a vehicle's perspective at night, showing a road with streetlights and a 'Live' indicator. Below the video, a 'Remaining Time' of '00:09:53' is shown. To the right of the video is a map view. At the bottom right, a table lists device statuses, all marked as 'Online'.

Fleet—Configuration (1/2)

The screenshot shows the VisionMax Fleet Configuration interface. On the left is a sidebar with the VisionMax logo and a navigation menu including: Mainfreight - Australia, Fleet operation, Dashboard, Trips, Safety, Management, Configurations (highlighted), Administration, Accounts & Permissions, Fleets, and Device Usage. The main area is titled 'Configurations' and contains several tabs: Device Settings, Sensor Event Detection, AI Event Detection, Traffic Signs and Signals Detection, Speeding, and Safety Score. Below these tabs are vehicle type filters: Passenger, Medium Vehicle, and Heavy Duty. The 'System' section is active, showing a 'Volume' slider with a value of 1 and a 'Video Recording' section. A blue text box is overlaid on the interface, stating: 'Configuration allows the administrator to adjust the CDR settings according to the vehicle type, such as volume, voice language, recording format, event recording settings, and more.' Below this box, the 'Audio Alert Language' is set to 'English (US)' with a dropdown arrow, and a 'Restore to Default' button is visible.

Fleet—Configuration (2/2)

The screenshot displays the VisionMax Fleet Configuration interface. On the left is a sidebar with the VisionMax logo and a navigation menu including: Mainfreight - Australia (Fleet Operation), Dashboard, Trips, Safety, Management, Configurations (highlighted), Administration, Accounts & Permissions, Fleets, and Device Usage. The main area is titled 'Configurations' and contains several tabs: Device Settings (selected), Sensor Event Detection, AI Event Detection, Traffic Signs and Signals Detection, Speeding, and Safety Score. Under the 'Device Settings' tab, there are three vehicle type buttons: Passenger (selected), Medium Vehicle, and Heavy Duty. The 'System' section is active, showing a 'Video Recording' option and a 'Volume' slider set to 1 (Mute). Other settings include 'Speed Unit' (KPH), 'Parking Photo' (All), 'RFID Audio Hint' (disabled), and 'Audio Alert Language' (English (US)). A 'Restore to Default' button is located at the bottom of the settings panel.

VisionMax Elastic (3/4)

Device Info & Health Report & Live View

The screenshot displays the 'Device Info' section of the VisionMax Elastic web interface. The left sidebar contains a navigation menu with 'Device Info' and 'Configurations'. The main content area is divided into two tabs: 'Overview' (selected) and 'Live View'. The 'Overview' tab shows the following information:

- Device ID:** Serial Number: C2424170422, IMEI: 11022236655447, Model: K245, Region: Taiwan (dropdown menu).
- Signal:** GPS Signal & Satellites In Use (0), LTE Signal (0.00 kb/s), Last Known Location: 57 Bao Dao Hua Yuan Er Qi, Kun Shan Shi, Su Zhou Shi, Jiang Su Sheng, China, 215337.
- Device Health Check:** Last diagnose: 02/19/2025 03:11:56 PM, Location Function: Unhealthy. A warning message states: 'The device's GPS module can't work properly since 01/09/2025 10:59:07 AM, failing to create new trips, detect new events and provide event trigger locations. Check the satellites in use first, if it's 0 then try to move the vehicle to a place that can see the clear sky. If still can't resolve the issue, contact support.'
- Sensor Events Detection:** Healthy (checked).
- Camera(s):** Healthy (checked).

Configurations

The screenshot displays the 'Configurations' section of the VisionMax Elastic web interface. The left sidebar contains a navigation menu with 'Device Info' and 'Configurations'. The main content area is divided into two tabs: 'Device Settings' (selected) and 'Live View'. The 'Device Settings' tab shows the following configuration options:

- System:** Video Recording (checked).
- Record Sound:** (checked).
- Video Snapshots:** (checked).
- Set Up Camera by model:** Model: K245/K245C (dropdown menu).
- Embedded Camera:** (selected), UVC Camera (unselected).
- Video:** Format: Separate (dropdown menu), Resolution: 1280x720. A diagram shows the camera's field of view with dimensions 1280 (width) and 720 (height).
- Speed & Coordinate Stamps:** (checked).

VisionMax Elastic (4/4)

Advantages:

1. Reduces development time — approximately 2 to 3 months for quick integration and faster time-to-market.
2. Data storage is managed and kept by the customer.

Disadvantages:

1. The Elastic Portal cannot be flexibly customized (only supports changing logo, domain, and background color).
